

VIEWING REQUIREMENTS

Maps
Profiles on web pages
Profiles in Excel spreadsheets
SuperTABLE data cubes

MAPS

The NRP uses interactive maps to enable you to select the region you are interested in.

To view maps you will need to install a Scalable Vector Graphics (SVG) Viewer. This can be downloaded free from the Adobe website. SVG content is not supported by all browser types (Internet Explorer may be required). If you are unable to use the maps, then use the 'by Name' options in the left menu bar to find your region of interest.

See Help on View SVG Content.

PROFILES ON WEB PAGES

You do not need any additional software to view the profiles presented as web pages.

[Back to Top](#)

PROFILES IN EXCEL SPREADSHEETS

To access the Excel spreadsheets, you can use a spreadsheet program like Microsoft Excel or Lotus 1-2-3, or Excel Viewer.

For further Help see Using Time Series Spreadsheets.

SUPERTABLE DATACUBES

You will need SuperTABLE to download data in the NRP data cubes.

If you do not have SuperTABLE, it can be downloaded free from the Space-Time Research website. For more information see Help on Download and Install SuperTABLE.

For further information about using SuperTABLE, including examples and links to other on-line resources, see Help on Using SuperTABLE.
